AB	<p>The compns. comprise cement-based hydraulic materials contg. silica fume, blast-furnace slag, and/or fly ash (C) 750-1300, aggregates (S) 400-1100, water (W) 270-420 kg/m3, and reinforcement fibers having fineness 55-270 dtex and satisfy $2.625 - 0.0075X \leq Y \leq 3.375 - 0.0075X$ and $47Y + W = 253 - 47Y + 293$, where $Y = C/S$. Hardened products of the compns. and on-site placing of the compns. and the products are also claimed. The products have high toughness and resistance to vibration.</p>				
ST	<p>cement hydraulic product fiber reinforced; vibration resistant fiber reinforced mortar; blast furnace slag fiber reinforced cement; fly ash fiber reinforced cement; silica fume fiber reinforced cement</p>
